

Plastazote® LD29ABK

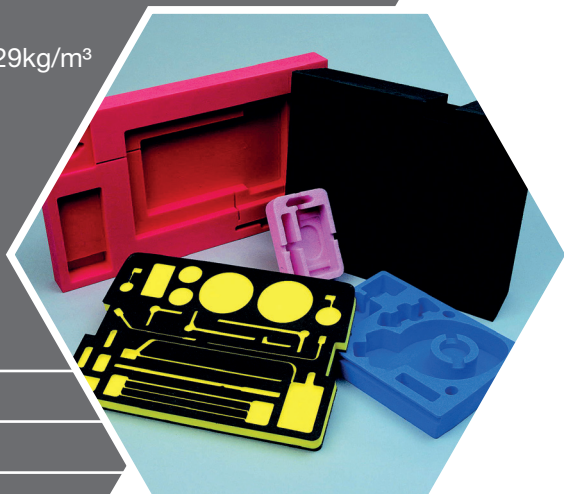

Plastazote LD29ABK is a closed cell, cross-linked polyethylene block foam, designed to improve efficiencies in product protection applications. It is a variant of Zotefoams' best-selling packaging grade LD29BK and is specifically targeted at product protection applications in transit, conservation, and storage, where optimum protection and durability are key considerations.

- New size to optimise yield
- Lightweight with a density of just 29kg/m³
- Consistent cell size of just 0.8mm
- Good absorbing properties
- Manufactured using a unique nitrogen expansion process making pure, odourless and non-toxic foams
