**The sustainable
barrier material**

Circular Packaging

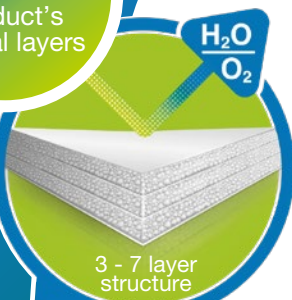

Fully recyclable mono-material barrier packaging

ReZorce® is an extraordinary range of mono-materials for pack formats such as cartons and pouches. It performs like current material choices in terms of barrier properties – but represents a huge step forward for the circular economy.

Meets food industry standards

Excellent print surface

Recycled HDPE can be used in the product's central layers

Compatible with existing processes and machinery

Circular Packaging

A better, simply circular solution

ReZorce Circular Packaging allows brand owners and manufacturers to comply with emerging standards for the use of recycled content in packaging and to progress to full circularity. Compatible with existing production, waste and recycling infrastructure, ReZorce is the simple, circular solution.
