## **Statement Regarding Resin Identification Codes (RIC) for Zotefoams Materials**

With regards to the identification of the raw materials used in our AZOTE® foam products (including Plastazote®, Evazote® and Supazote®) and ZOTEK® foam products (including ZOTEK® F, ZOTEK N® and ZOTEK T®) I am pleased to confirm the following codes apply:

**Plastazote® LD: LDPE (code 4)**  
**Plastazote® MP: LDPE (code 4)**  
**Ecozote® LDR: LDPE (code 4)**  
**Plastazote® HD: HDPE (code 2)**  
**Plastazote® FM/FR: other (code 7)**  
**Evazote®: other (code 7)**  
**Supazote®: other (code 7)**  
**ZOTEK® F: other (code 7)**  
**ZOTEK® N: other (code 7)**  
**ZOTEK® T: other (code 7)**

**Please note: Using the RIC does not imply the material can be recycled. It allows identification for sorting and recycling where possible. For example, most recycling centres cannot recycle foamed polymers, no matter what resin they are manufactured from.**

I trust that the above statement is sufficient for your needs, however if further information or clarification is required then please do not hesitate to contact the undersigned.

Yours Sincerely,

**Iona Williams**  
**Technical Support Engineer**
