Statement regarding Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS) in AZOTE® products

This is to confirm the status of Zotefoams' AZOTE® foam products (including Plastazote®, Evazote® and Supazote®) regarding the use of Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS) and their presence or otherwise in the foam.

I can advise that at no stage during the manufacturing process utilised by Zotefoams plc for the manufacture of AZOTE® foam products are Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS), or substances known to contain them, intentionally added to the product formulation.

It is important to note that this statement applies to the foam product as it leaves Zotefoams production facilities. Zotefoams will not accept liability for other materials or processes used in combination with the foam in order to produce a final product.

I trust that the above statement is sufficient, however if any further information or clarification is required then please do not hesitate to contact the Technical Support group at the address above.

Yours sincerely,

Iona Williams
Technical Support Engineer
