REF: Statement regarding Persistent, Bioaccumulative, and Toxic (PBT) Chemicals under TSCA Section 6(h)

Persistent, bioaccumulative and toxic (PBT) chemicals build up in the environment over time and can therefore have potential risks for exposed populations. With regards to a statement confirming the compliance of Zotefoams' products including AZOTE® product ranges, Plastazote®, Evazote® and Supazote®, and ZOTEK® product ranges ZOTEK® F, ZOTEK® N, and ZOTEK® T, I am happy to confirm the following:

I can advise that at no stage during the manufacturing process utilised by Zotefoams plc for the manufacture of the above products are the following, or substances known to contain them, intentionally added to the product formulation:

Name	CAS No.
Phenol, isopropylated phosphate (3:1) ("PIP (3:1)")	68937-41-7
Hexachlorobutadiene ("HCBD")	87-68-3
Decabromodiphenyl ether ("DecaBDE").	1163-19-5
Pentachlorothiophenol ("PCTP")	133-49-3
2,4,6-tris(tert-butyl)phenol ("2,4,6-TTBP").	732-26-3

It is important to note that this statement applies to the foam product as it leaves Zotefoams production facilities. Zotefoams will not accept liability for other materials or processes used in combination with the foam in order to produce a final product.

I trust that the above is sufficient for your needs however if you do have any questions, please do not hesitate to contact the undersigned.

Yours sincerely,

Matt Bosly
Technical Support Engineer
